

SIGN DESCRIPTION

For Sale Signs included:

- 2 grommets on top
- Double-sided printing

6mm PVC "Our most Popular"

PVC is a smooth rigid, solid plastic material that is ideal for tough, long lasting outdoor signs, great with photographs.

10mm Coroplast

Corrugated plastic is also a preferred form of outdoor signage due to its ability to withstand many types of environments and weather conditions. It is not as heavy or flat as 3mm PVC.

3mm Aluminum

Because of its durability, dimensional stability, strength, and lightweight, ACM is commonly used for exterior and interior signage, in construction for building cladding, insulation, and wall linings, and as a substitute for steel in many applications. *(Colors might change on substrate)*

Please add 2 grommets on bottom for riders

Condo Signs

- Printed on 3mm PVC
- Double-sided printing
- no grommets included
